- **SUPPORT A NEW FARM BILL** Because Congress failed to pass a new farm bill by September 30, dozens of effective food and farm programs have had to shut down their operations. Conservation programs that protect our soil and water must turn eager farmers away. Proven initiatives that help connect food producers with local consumers no longer exist. But, it's not too late to get a strong new farm bill in place this year. It's hard to overstate the impact that the farm bill has on all of our lives. Its programs address major challenges facing our nation, and they empower farmers, businesses, and communities to build food and farm solutions that work today and for future generations.

[Urge your members of Congress to pass a farm bill that provides strong, reliable support to farmers, eaters, and local economies before the end of 2018.](#)
